SUBJ: 700 MHz Relocation Certification Information (PS Docket No. 06-229, WT Docket No. 96-86  
& DA 07-4168

The City of Owensboro, acting as lead agency for the Ohio Valley Interoperability Communications Consortium (OVICC), hereby decrees that the following information is correct as of 30 August 2007. The OVICC, which is comprised of eight separate agencies, acquired and deployed 700 MHz equipment (Mobile Data Communications Network) in the lower half of the 700 MHz public safety band for Broad-band communications (763-768/793-798 MHz). After an extensive auditing process we've developed the following list of answers pursuant to the FCC's request:

- 1). One Hundred and Forty Two IPMobileNet modems (mobiles installed in law enforcement vehicles) and two are located in a forward supply point acting as spares for the OVICC.
- 2). The primary regions of operation are: Daviess, Henderson, Ohio, Union, Webster, McLean, and Hancock counties in the state of Kentucky.
- 3). Three narrowband base stations serve the handsets in question.
- 4). Two base stations are located in Owensboro. Kentucky (37-45-45.0 N, 087-05-30.0 W) and a third base station is housed in the City of Henderson (37-47-31.0 N, 087-34-17.0 W).
- 5). The points of contact are:
